

# Who we are

*Addressing climate change through responsible social-economic activities.*

**Icare Sustainably** is a team of international individuals who are socially and environmentally conscious and seek to bring change in the world by using sustainable solutions that improve livelihoods in marginalized and rural communities. We bring sustainable solutions to the growing climate change menace and incubate environmental-friendly ideas at the same time addressing the poverty challenges, food security and joblessness amongst the youths in marginalized communities.

## What we do

We are keen on achieving the UN sustainable development goals covering every dimension of economic, environmental and social sustainability and particularly focusing on conserving the land and the waters through availing safe sites for disposal of non- biodegradable waste in our environment. We are working towards a world where our environment is safe from toxins, well-protected living beings and humans acting responsibly on non-biodegradable waste disposal, we educate communities about the reality of climate change and promote both local and global solutions by incubating environmental-friendly ideas which aim to improve livelihoods in marginalized communities.

We also work towards reforestation for stabilization of the ecosystem through agroforestry and reduction in deforestation through renewable energy and strive to achieve food security in those communities by the creation of a circular economy.

## Where we are

Icare sustainably is a non-profit organization that specializes in international environmental sustainability projects with operating offices in Africa, The Caribbean, India and Europe.

## Our vision

Icare Sustainably visualizes a sustainable and equitable development for every individual from disadvantaged conditions in the society in order to mitigate any differences in gender, race, social and economic, academia and corporations with social corporate responsibility towards an improvement of the environment and social capital.

## Our mission

To bring inspiration and innovation to society for sustainable development.  
Icare Sustainably will accomplish these aims by:

- a) Supporting national associations in their activities.

- b) Carry out topical and specific programs such as training on the sustainable development goals, conduct programs on food security, climate action and environmental protection activities, incubation of environmentally friendly ideas and ICT integration in sustainability programs etc.
- c) Inform, and attempt to influence and work in collaboration with policymakers, academia, professionals and corporations to catalyse the protection of the environment whilst also ensuring continuing of the livelihoods of the surrounding rural communities.
- d) Promote research into how to combine the development of the people, protection of the environment and technology and the links between the three.
- f) Contribute to the education of professionals, scientists, schools, students in the field of environment conservation, and sustainability to impact business, mitigate pollution in the rural communities and ensure sustainability in food security, quality education and poverty eradication.
- g) Collaborate with the Government, NGOs, schools and universities to ensure achievement of sustainable development goals.

## What we believe in

We believe in the restoration of human dignity through a clean and habitable environment by connecting climate change solutions to the lives of every individual.

### Our values

1) **Environmental justice;**

The right to an environment that is not harmful to individual health or well-being and to have the environment protected for the benefit of present and future generations through measures that prevent pollution and ecological degradation.

2) **Balance**

A balance between environmental sustainability and socio-economic empowerment.

3) **People-driven**

We value people; we believe in human dignity and believe that every human being should have an opportunity to live in a healthy and clean environment. We believe in teamwork from various multi-sector disciplines.

4) **Communication**

Covering all different ways of communicating with people to transfer the awareness and value of our planet and our species, we find a need to express this priceless magnitude in a contagious and positive manner.

5) **Hard work and commitment**

Stay true to our mission and love for humanity and commitment to a safe and secure world for all.
